DETAILED ACTION

The Amendment filed on September 21, 2006 has been acknowledged.

Claim Objections

Claim 79 is objected to because of the following informalities: Cancelled claim 79 cannot contain any text. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 29-33, 35, 36, 38, 39, 41-45, 48, 50-52, 54-58, 60, 61, 63-76, 78-99, 102, 104, and 105 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 29, 44, 45, 52, 102, and 104, it is unclear how the thermoplastic bonding component being bonded to the surface of piezoelectric element can also include a filter

and function as one. Fig. 3 shows the thermoplastic bonding component (90) to be bonded to a surface of a piezoelectric element (34, 34'). However, since the thermoplastic bonding component is bonded to the surface, it is not possible for it to function as a filter since the bonded surface of piezoelectric element would prevent the flow of fluid to flow to the other side (bonded side) of the thermoplastic filter (Fig. 3).

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
